PATROL WITNESS™

POLICE IN-CAR VIDEO SYSTEMS

PatrolWitness™ *introduces the* **PWLite** *Digital Video Solution, for Law Enforcement, Fire & EMS, and public safety services.*

PWLITE

PWLite features fanless operation, ultra low power consumption, extended operating temperature ranges, high level of security encryption from recording to storage and retrieval of video, audio and metadata; preserving the integrity of recorded evidence.

The system is simple to install, easy to operate, and is backed with a 1 year warranty. *Upgradable to PW-III, includes HandsFree™ wireless upload, Redundant Video Storage, and 3 Year Warranty.*

Rugged Design
Premium Features
Upgradability
for under $3000

- OEM-Replacement Rear View Mirror
- Built-in 4.5” LCD Monitor with Speakers
- Secure, Lockable CF Card Storage

SYSTEM COMPONENTS

Toll-Free: 1-866-693-7492

ShieldCam™

- True 720x480 High Resolution
- Built-in microphone with crisp clear audio
- Multiple mounting options
- 3-Axis, Ball-in-socket for precise aiming
- IR model, for low-light conditions

LP Zoom Camera

- Compact Size
- Red LED record indicator
- One Button License Plate Zoom
- 500 TV Lines Resolution

PWLite DVR/ Controller

- H.264 Video Compression
- User defined resolution, Max 708 x 480
- User defined framerate, Max 30 fps
- 2 Channels Video & 2 Channels Audio (RF&Wired)
- User defined Pre & Post-Event Recording
- OSD for Date, Time, GPS, Storage usage, Usernames
- Metadata embedded in Video stream
- Record Triggers, Manual or mirror control, Wireless audio, Lightbar + 4 additional
- Proprietary Data Encryption and lockable storage media
- Solid State Removable Storage, 16GB Compact Flash

Wireless Audio System

- 2.4 GHz spread spectrum technology
- In-Car rechargeable Transmitter
- Up to 1500ft operating range

Security Keys

- Unique Security Key, cannot be copied
- Ensure the recorded data can only be accessed and viewed by authorized personnel
- Recorded Video/Audio data cannot be viewed without the Security key.

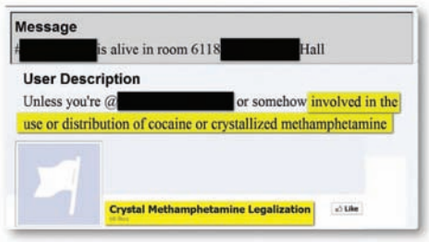
Computer Hardware and Software



New Social Media Surveillance Tool

ECM Universe's **Social Media Surveillance Solution** makes analytic tools – previously available only to elite defense and law enforcement organizations – affordable by organizations of all sizes and stature. The **RCA Social Media Surveillance Solution** provides real-time monitoring of Twitter, Facebook, Google, Instagram, classified sites, and many other online communities where users express themselves freely.

RCA's 24-7 automated, continuous surveillance of a jurisdiction is analogous to street corner video surveillance cameras capturing all "conversations" and "comments" relative to the jurisdiction and ongoing investigations. The software captures "chatter" related to any topic, including threats, drugs, theft, assault, prostitution, fraud, and suicide. The conversation topics it can capture are unlimited. It copies messages from social media sites, so that messages are available even after the message has been removed.

Circle 2003 for More Information

Omnivore Now with Audio Capabilities

Ocean Systems has expanded its Omnivore's capabilities by adding **audio capture** to its video capture abilities. With this added feature, users can capture audio from surveillance systems, online videos (such as Facebook and YouTube); video from interview rooms; and other recording devices as uncompressed sixteen bit stereo data. This portable digital acquisition tool is easy to use.

Circle 2004 for More Information

New iPad® Application

New World Systems has introduced **Aegis LaunchCommand**, an iPad application designed to meet the growing need for mobility for police and public safety professionals. **Aegis LaunchCommand** offers access to role-based dashboards, a dispatch monitor, and Web-based inquiries with the flexibility to work from anywhere. It provides the tools to aid rapid assessment, improve situational awareness, and enhance decision making.

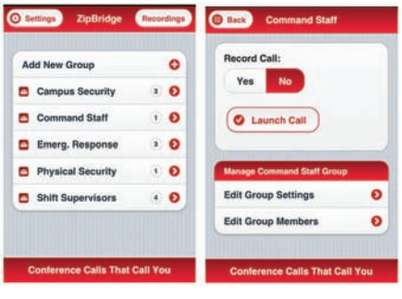
New Rugged Tablet

GammaTech has announced its newest rugged tablet, the **Durabook TA10**, designed and engineered for demanding applications. The high-end unit features a 10.4" multitouch panel with tempered glass and ultrahigh brightness LCD, an Intel Ivy Bridge processor, and two six cell battery packs. The unit meets Military Standard 810G for drop and shock resistance, and IP65 for dust and water resistance.

Security features include TPM 1.2 data security technology; a Kensington lock connector; and Intel antitheft technology (AT) or Computrace asset management and data protection. Optional features include a UHF RFID reader, a barcode scanner, a fingerprint scanner, a smart card reader, internal GPS, and more.

Circle 2006 for More Information



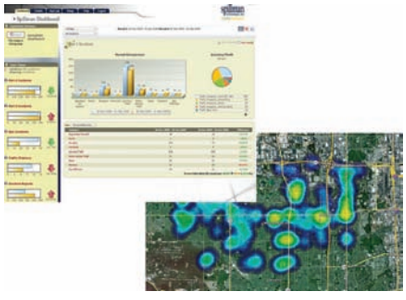
A New Way to Conference Call

While federal and state authorities are equipped to handle more types of emergencies, local governments may not have the emergency response infrastructure or communications to handle a natural disaster the magnitude of Hurricane Sandy.

Sometimes, the only option for reliable telephone communications is expensive in-house conference calling systems and the traditional call-in conferencing with pin numbers. This process is already challenging from a landline phone, let alone from a cell/mobile phone.

A new and innovative way to conference call has just been developed. **ZipBridge** outbound conference calling is easy to set up and allows the call host to instantly connect with key personnel over landlines or cellular phones. **ZipBridge** provides instant group communications without the hassle of setting up a conference call number and access pin. It can be used for routine operational calls, short notice command staff meetings, or during critical incident response.

Circle 2007 for More Information



New Software Module

The **CompStat Dashboard** software module, from Spillman Technologies, Inc., allows agencies to quickly identify problem areas and conduct intelligence-led policing initiatives. The software calculates crime trends and patterns using records in the Spillman database, then presents the information in an easy to analyze format. Graphs allow agencies to identify changes in crime and quality of life factors, and integration with Google Earth™ maps allows users to pinpoint crime hot spots.

Circle 2008 for More Information

Are Lights and Sirens More or Less of a Liability?

NEWS

Standard operating procedures in many police departments require lights and sirens when a police officer responds to any call at speeds over the posted limit. Emergencies where this may become necessary include officers in trouble, assaults or other violent crimes, and vehicle pursuits in hazardous conditions.

In some cases, though, lights and sirens can chase criminals away (thus, reducing the likelihood of arrest), distract drivers, and even fail to get drivers and pedestrians needed attention. Burglaries and nonfatal collisions often fall into this category.

In some communities, even robberies in progress or traffic collisions do not call for emergency equipment, and failure to use lights and sirens can result in greater liability when civilians end up hurt or killed. In Wichita, KS, for instance, three people since 2007 – including a 12-year-old girl – have died in collisions with speeding cruisers which were allegedly running against policy with no lights or sirens. Attorneys in those lawsuits believe the police department's policy needs to change and, so far, the city has paid $500,000 in settlements. Moreover, more police officers die in traffic collisions per year than in firefights.

Most standard operating procedures, and even some state laws, require police to obey the speed limit when lights and sirens are not activated. This is so other drivers and pedestrians have a chance to react. Even when the equipment is activated, officers must still slow down at intersections, lights and stop signs; some agencies tell officers they cannot exceed a certain point over the speed limit. GPS can help monitor officers' speed, as well as their locations, and give supervisors a way to ensure policy compliance.

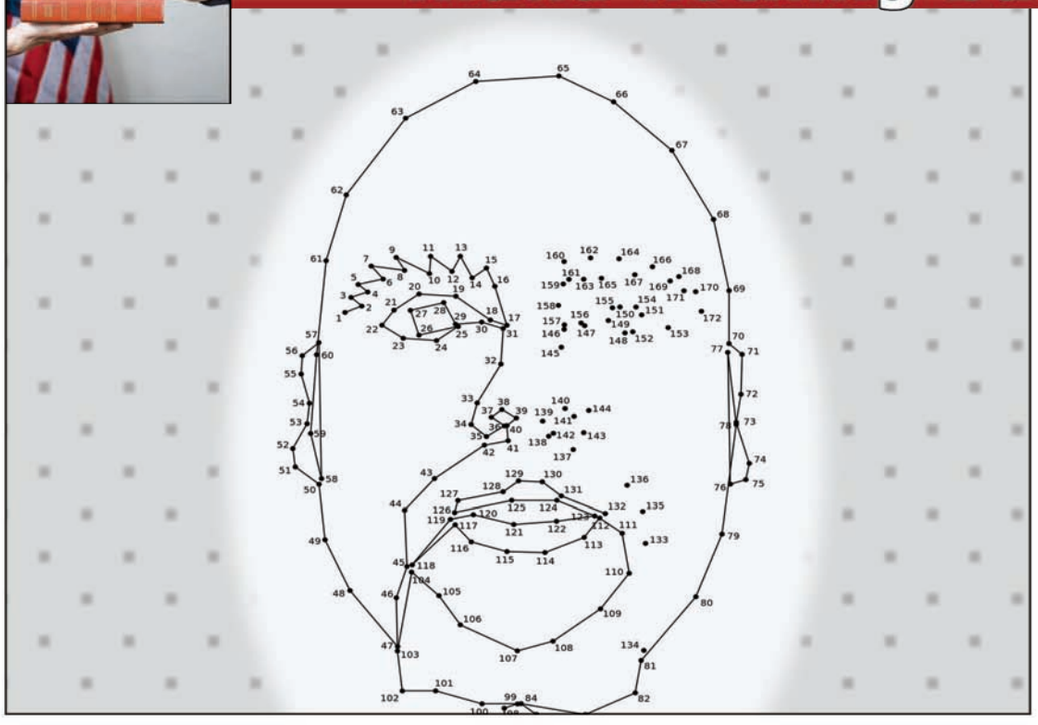
...and nothing but the truth.



Ramesh Nyberg

THIS PUZZLE DEFIES LOGIC

There are times when I wish I didn't think like this, but, sadly, I do. I begin looking at things happening around me and start connecting the dots.

It turns out that I have to take a couple of college classes to keep my teaching certification up. I haven't taken college classes since 1978. One of the classes I am taking uses a textbook called *Readings for Diversity and Social Justice*. I have read several assignments and I have found out some amazing things. I have found that, unbeknownst to me, I have oppressed people because I am male. I have also enjoyed *and* been oppressed by something called "white privilege." At some point, I enjoyed a "Christian privilege" as well and that all people of color are oppressed by both of these privileges, resulting in things like depression, suicide, and "horizontal violence."

The overall message of the book is bleakly clear: We haven't gotten very far from when schools were segregated and women were considered second-class citizens. Anyone who is not white, male, and Christian is doomed to a life of oppression and bigotry. Even whites who are accepting and loving and open-minded are still oppressing everyone because they enjoy white privilege – and, heck, man, we might as well throw in the towel.

I scratched my head as I read. I could *swear* we have a black president, don't we? And wasn't that Hillary Clinton there, flying around the world representing the United States as Secretary of State?

Look, I don't need a lecture on racism. I grew up in the South and I have brown skin. I know it; I lived it. My mother was denied entry into a restaurant in 1961 in Miami. I got called the "N" word by white kids and had rocks thrown at me by black kids. What was I supposed to do – grow up hating *everyone*? The story which isn't told – which I would like to, at least, impart to you here – is that, looking back, I had more positive experiences growing up than I did negative ones. My mother became a schoolteacher and eventually a school principal in her 37 year educational career. She attained a Ph.D. in music education and was called "Dr. Nyberg." And, *that* was in the late '60s to early '70s. What I learned from Dr. Nyberg was that, if you have a passion for something, you work hard, focus on your commitment to excellence – starting with *yourself* – most people will respect you. The ones who don't can go jump in a lake, and probably don't matter much anyway. I saw her overcome one obstacle after another, in a country she didn't grow up in, and she raised me to be a reasonably well-adjusted person, all while dealing with an alcoholic husband.

Okay, enough about all this. You get the picture. I could write a book about overcoming everyone else's perceived "privileges" and accomplishing your goals by perseverance and unwavering faith in your own strength and abilities. I could call it, *Readings for Social Success and Overcoming Diversity – and Adversity*. The problem is: I haven't written it yet and, instead, today's college students are immersed in this gloomy, bitter, glass half empty approach to their own self-identity.

And, here's where the dots start getting connected.

One day, in the not too distant future, almost all police departments in the land will have embraced "accreditation," and probably require at least an associate's degree. Most, if not all, federal law enforcement agencies already require a four year degree. The future ranks of our police departments, our federal agencies and our sheriffs' offices are going to be going through these lie factories. They will be bombarded and brainwashed and inundated with the outmoded rhetoric of social misfits and naysayers. The "professors" and "scholars" of their day will be the ones who camped on sidewalks during the Occupy movement, waving banners criticizing a country they nurse from, but do not fully understand.

Rather than "diversity" – which is a celebration of American people – they will be taught to be staunch "multiculturalists," defining and redefining their differences with each other rather than exploring ways to integrate and work side by side.

Did all the work and toil and sacrifice of people like Thurgood Marshall go to waste when they finally brought *Brown v. Board of Education* before the Supreme Court and won an immense victory? If integration was to be the sowing ground for malcontents who only want to focus on differences and past regressions, perhaps "separate, but equal" was a better idea. The ideas these people espouse are so profoundly and transparently hypocritical, it is infuriating to think that this is the staple food fed to all the new teachers coming into the country's classrooms. How do you sit there and tell black people that they have no voice because of Christian privilege, when the vast majority of them (at least the ones I know down here) are Christian themselves? This is just one example of how, page after page, the same mantra of hopelessness and despair is drilled into the student. One of the chapters is titled, "The Possessive Investment in Whiteness." How stupid does this radical regime of people think everyone is?

The problem is this: Lots of workers – from high school teachers to law enforcement and social workers – are walking through a funnel of "higher education" before they emerge into the workplace. They are a young, impressionable, *captive* audience. They will suck up whatever is thrown in front of them to attain their goals, certifications, and their job security. Then, they will go out into the streets and classrooms and spew the same beliefs to tomorrow's students and their own children. It's the most vicious of vicious cycles.

I hope I'm wrong. You know, my high school

students amaze me. They are far more accepting, tolerant, and unconcerned with race, gender, sexual identity, or disability than my generation ever was. Our generation berated, ridiculed, and even physically abused people who weren't as able or socially fit as we were. Today's students – and here is where I get the hope to solve this problem – are nothing like that. I used to get frustrated at their "whatever" attitude towards things, but it has a positive side. When they are told about someone's skin color or cultural trait, it is that "whatever" attitude I kind of like.

Connecting the dots can be a scary thing, but maybe we can start making patterns of our own. I encourage everyone out there to speak the truth when confronted with obvious lies. I am challenging this college book every chance I get, and it might get me a bad grade, I don't know. But, I'm not going to embrace something I know is wrong and harmful to society. We can also write – columns like this one, letters to your congressman – whatever it takes. Most of all, though, we must teach our children the way to be successful in life is through determination and a will to succeed. Show them that they have the strength and confidence to overcome anything, regardless of who they are or what they look like or how other people categorize them.

I've got a new one: *vertical violence*. That's what the authors of these books are practicing. That's telling me that, because of where I was born or what color my skin is or what my parents believed in, I reside somewhere on someone's imaginary social totem pole.

How dare they. PSN

About the Author: Ramesh Nyberg retired from law enforcement in November 2006. He spent 27 years in police work in South Florida, 22 of those years in homicide as an investigator. He has taught homicide investigations and interview/interrogations at the local police academy. He now teaches criminal justice classes at a Legal Affairs Academy program in a magnet high school in Miami. His students frequently read the copies of Police and Security News *he brings to the classroom.*

Just Ask Mike...

Michael Carpenter

SURROUND YOURSELF WITH COMPETENCE

"Yes-men" may be good for your ego, but, when it comes to effectively running your shift or your division or your agency, you need competence – not compliments.

Since you can't be everywhere all of the time, you need trusted subordinates with the background, training and loyalty to do the right thing, at the right time, for the good of the organization and its goals. You can control your own destiny and make your job a LOT less stressful by consciously developing qualified subordinates, so that they can eventually take over the running of critical segments of your organization. Once developed properly, those competent individuals are the people who will make you shine while they work for you and when they get promoted.

I compare employees to a bell-shaped curve: There are a few who are less than competent (you usually spend way too much time dealing with their problems). If we were talking academics, these employees would be getting D's and F's in class. The majority of employees you supervise are competent, but they do average work (usually by their choice – but, perhaps, because you have not motivated them properly). In academics, most students in a class get C's – and most employees in any workplace would get C's. (Don't even start talking to me about standard deviations on the bell-shaped curve!) And, then, there are a few employees who clearly and obviously rise above the rest, just like there are a few students in a class who get A's. Think about all the employees who work for you and I'm sure you can place them quickly on the bell-shaped curve.

There are really only five steps in the process of developing subordinates who will be capable of assuming critical roles or completing critical assignments or grooming for promotions. Here they are:

Identify Winners

With an open mind, it's really quite easy to identify the employees who are "winners" (or who I refer to as the "A" employees) on your shift, in your division or in your agency. These employees stand out among their peers within an organization and have the potential to be successful in the long run. Perhaps they possess many of the same characteristics you have. These employees generally have a high level of energy. They have enthusiasm for, and a dedication to, their job. They have a solid moral fiber and above average intelligence. In short, they have the basic skills to be successful in any field, but you are fortunate enough to have them in your command. Now, you need to cultivate them before they become burned-out and/or change careers.

Train Them

Even the best people cannot reach their full potential until they're given the tools to do their job and given direction in how to use them. In the field of law enforcement, that means training and education.

Knowledge is power and your subordinates need to receive all of the knowledge you can give them if they are to make themselves and your agency better. Send them to schools and seminars; direct them to the training resources which will help them in their job now and in the future. Encourage them and open whatever doors you can.

Groom Them

There is much about law enforcement work which is not found in college or academy classrooms. Your rising stars will start with a base knowledge, but you need to give them more.

Just as someone took you "under their wing" many years ago and showed you the way to success, now it's your turn to lead the way for others. Sharing the subtleties of the job with your subordinates, putting them in critical positions, and allowing them to succeed is what mentoring is all

Circle 2014 for More Information

about. Let them grow under your direction and guidance and you will have a loyal and competent coworker for life. Without that informal knowledge, imparted to them by those who know the ropes, total success can be a difficult battle.

Encourage Them

In many departments, promotions can be few and far between. It is your duty to keep your subordinates motivated during the time they are waiting for an opening for a promotion, so they will be prepared when the opening does occur.

Your praise for their performance in their present position, whenever warranted, is a powerful motivational tool. Recognition of their efforts to continually improve their abilities through training and education can mean a great deal to them. And, of course, you should encourage them to continue their development for their own benefit, as well as for the benefit of the organization.

Be sincere in your praise and encouragement. Your encouragement should stop short of a promise of promotion, but it should provide hope for their future with your department.

Promote Them

When openings do occur, look to your best and most qualified people first. It may be difficult to see over the crafty politician or the smiling approval of the "yes-men" or "yes-women," but your future success – and the future success of your agency – depends on placing the most competent people in your most critical positions.

Do whatever it takes to get the people you have groomed into the right slots. You want the most qualified, dedicated and motivated people on your own team. If you have done your job, they are waiting at the sidelines, eager and ready to get into the game and make you and your agency a winner.

About the Author: Mike Carpenter has been on the police side of criminal justice for more than 25 years. He started out as a city cop and then went to a state police agency (trooper, detective and patrol sergeant). After that, he worked for the New York State Police Division of Criminal Justice as a police training specialist.

Currently, he teaches criminal justice courses at a college in upstate New York. He has two master's degrees; has been a certified police trainer for more than 20 years; has written numerous articles; and operates a police management consulting business (www.policemanagement.com).

Product Highlight

Law Enforcement Flashlights

STREAMLIGHT, INC.

The **TLR-2® G** is a lightweight, gun mounted, tactical light featuring a green aiming laser for high visibility, long-range targeting. It delivers 200 lumens and 6300 candela peak beam intensity. It features a shockproof C4® LED and a 522-542 nm green laser integrated into the light's reflector. The light can be deployed in "laser only" mode to keep the gun on target; in "LED only" mode to provide bright, focused light; or in "dual mode" which uses both light sources.

Circle 2018 for More Information

AE LIGHT

The **AEL600 LED Flashlight** is compact, lightweight, and utilizes a Cree® XM-L T6 LED chip with a life span of 50,000 hours. Producing 600 lumens, the **AEL600** lights your target from 850 feet; the tactical switch controls three modes of operation (high, medium, and low); and the soft touch on/off switch allows for setting the output to the desired intensity. Designed to be mounted on rifles, the electronics are isolated to absorb recoil shock; an optional pressure switch is available for remote switching.

Circle 2019 for More Information

BLACKHAWK!®

The **Night-Ops® Ally™ compact handheld flashlight** boasts a compact profile and smaller diameter with a pocket clip for everyday carry. Its aluminum body with hard coat anodized finish will give you long lasting performance for any task. The rotating function selector switch allows you to activate the light with your preferred setting; no need to scroll through functions with a momentary switch. The maximum output for each model is 100 lumens (L-1A2) and 150 lumens (L-2A2, L-3V), and the length of each model is 4.5" (L-1A2), 6.3" (L-2A2), and 4" (L-3V).

Circle 2020 for More Information

KEL-TEC CNC INDUSTRIES, INC.

The **Kel-Tec CL-43** is an extremely bright flashlight designed to be used in conjunction with a firearm. Machined from extruded 6061 aluminum, the light operates via a rearward click button located midpoint of the flashlight with both constant and momentary on capabilities.

The exterior features a patented nonslip pattern common with Kel-Tec's firearms. Its surfaces are either hard coat anodized or Cerakoted™. It is available in five colors and its extreme light power of 420 lumens features an optimum beam angle. The **CL-3** operates on three CR123 lithium batteries and features a Cree® XP-G LED. Its weight (with batteries) is 3.8 ounces and its size is .94" x 1.5" x 4".

Circle 2021 for More Information

MAG INSTRUMENT, INC.

The new **Maglite® PRO™** not only has the look of the original Maglite D cell flashlight, but now it also houses a state-of-the-art ultrabright LED light which combines 274 lumens of output with efficient power usage. It measures ten inches long, has a barrel diameter of 1 9/16", and weighs 23 ounces (with batteries).

Circle 2022 for More Information

STREAMLIGHT®, INC.

Streamlight has added new High Lumen (HL™) models to its popular Stinger® LED and Strion® LED series of lights. The new **Stinger LED HL**, the **Stinger DS® LED HL**, and the **Strion LED HL** now use state-of-the-art C4® LED technology to provide law enforcement, tactical, outdoor and other users with extreme brightness, delivering up to 640 lumens. All of the new models provide three microprocessor controlled variable intensity modes.

Circle 2023 for More Information

OLIGHT

The **M20S-X** has all the features an officer needs and comes equipped with a removable pocket clip and holster, and is compatible with a weapon mount. It has a crenelated bezel for self-defense applications; a tailcap switch for on/off operation; and a side switch which is used to rotate between three output modes and the strobe mode. It has a maximum output of 500 lumens and a maximum run time of 85 hours.

Circle 2024 for More Information

QUIQLITE

The **QuiqLiteX XFlare** attaches to your QuiqLiteX and is perfect for situations when you need to be seen while working in the dark. Visible from over 1.5 miles away, the **XFlare** can be used to mark hazards, for roadside emergencies or other situations when a bright flashing light is needed. Made from durable nylon plastic, it will burn up to five hours on a single charge.

NEW GUNS FOR 2013

***Police and Security News* brings you its 22nd annual roundup of new firearms - straight from America's premier firearms trade show event.**

The annual Sporting, Hunting and Outdoor Trade (SHOT) Show provides a major venue for manufacturers and dealers to showcase their products and introduce new models. It gets larger each year. The 2013 show, held in Las Vegas in January, boasted 1600 plus vendors, 62,000 plus attendees and some 2000 media types. As usual, the show's size makes it extremely difficult, if not impossible, to take notice of all the products related to firearms.

Last year, the show's unusually high demand for small, concealable handguns, coupled with a noticeable increase in AR-based rifles, was dismissed by some as an outlier – a onetime reaction to the Presidential election. If so, the "reaction" has gotten even stronger for those rifle and handgun types, driven by the possible government intervention in the sale and possession of such rifles and standard magazines for both rifles and handguns. The increase in demand for ammunition for these firearms has added to the ammunition back orders. One anecdotal example has a bulk buyer for .556 NATO and 9x19mm training ammo being quoted a delivery date of "sometime in 2014."

Despite these demands creating huge back orders, new models of both rifles and handguns were introduced and orders placed in the face of vague estimated delivery dates. (Indeed, one handgun manufacturer continues to have a composite six digit number back order for its products.)

In the AR rifle arena, several new entries stand

Circle 2033 for More Information

out. SIG SAUER® introduced its MPX submachine gun, available in four law enforcement/military variations and one semiauto carbine variation which is civilian legal (where permitted). Smith & Wesson® offers the AR-based M&P rifle chambered in 7.62 x 51mm (.308 Winchester®) and Israel Military Industries (IWI), a newcomer to the U.S., offers the AR configured TAVOR bullpup rifle chambered in 5.56 NATO (.223 Winchester).

To follow are the latest innovations from the best known manufacturers. As always, we strive to concentrate on those new firearms which have more law enforcement "appeal" – either to agencies or individual sworn personnel.

SIG SAUER, Inc.

SIG SAUER's new MPX submachine gun (government and law enforcement sales) has semi- and full-auto capability and is chambered in 9x19mm, .357SIG and .40S&W, fed from a ten, 20 or 30 round proprietary steel magazine. An integrated sound suppressor is also an option.

The MPX uses a gas operated, short stroke piston system and has a fully closed and locked rotating bolt, changeable barrel lengths, and an aluminum or carbon fiber fore end, as well as fixed, folding, collapsible or pistol grip only stocks. All these options are changeable "in the field."

The MPX will be offered in four law enforcement only configurations. The standard SIG MPX is a 6.5" barreled, select fire SMG (weighing 4.6 pounds, without magazine). The SIG MPX-SD is integrally suppressed with a new SIG silencer technology designed specifically for the weapon. A compact variant, the SIG MPX-K, is available with a 4.5" barrel. Also available is a select fire pistol variant with a 6.5" barrel. A modular handguard (available in aluminum or carbon fiber) features a 12 o'clock M1913 rail and the ability to add rails at the three, six and nine o'clock positions. The consumer version, the SIG MPX-C is a semiautomatic with a 16" carbine barrel. The MSRP is $1,800 – $2,100, however, no availability estimate was given.

SIG SAUER® Model MPX submachine gun chambered in 9x19mm, .357SIG and .40S&W

SIG also introduced the SIG SAUER P227 which, in short, is chambered in .45ACP, with a double column, ten round magazine (14 round mag optional), steel slide on an alloy frame having a one-piece grip and an accessory rail. Also, the SIG short reset trigger is used. The M227 is the single column P220 on steroids, weighing in at 30.5 ounces (without magazine) and with a length of 7.1 inches. It has an MSRP of $993 with contrast sights.

Smith & Wesson® M&P10 in .308 Winchester

Smith & Wesson, Inc.

Smith & Wesson further expanded its M&P line of rifles by introducing the S&W M&P10 chambered in 7.62 x 51mm (.308 Winchester). The M&P10 is a semiauto, has an 18" barrel with a one in ten inch twist, Magpul® MOE rifle stock, ambidextrous safety and bolt release and forearm with Picatinny rail. The trigger pull is listed at 6.15 pounds, weighs slightly over eight pounds, and ships with one 20 round PM magazine. MSRP is $1,729+. I did not get any hard delivery data. (That's not surprising, given the government's move to "control" such semiauto long guns.)

Israel Weapon Industries (IWI), Ltd.

IWI is a member of the SK Group. The TAVOR bullpup rifle will be in a civilian legal semiauto version and is tentatively scheduled to be available in March of this year. The TAVOR is chambered in 5.56 NATO with a 30 round magazine (AR mags work) and either a 16.5" or 18" barrel. The handguard with Picatinny rail is on its top side.

IWI TAVOR bullpup rifle, chambered in 5.56 NATO

Caliber changes can be made with conversion kits which are also available to change to 9x19mm or 5.45x39mm. Also, the TAVOR can be changed by the user to fully left-handed operation, including charging handle. It has a cold hammer forged, six groove, one in seven inch rifling barrel and is currently finished in flat dark earth and black. The MSRP starts at $1999.

FNH USA LLC

FNH USA, a subsidiary of FN Herstal S.A., has not neglected the needs of the dedicated marksman with the FN SPR™ A5 XP which replaces its existing A5M bolt-action rifle. The new model has a one in twelve inch rifled barrel, threaded to accept a suppressor. The bolt handle is oversized and the stock now has a McMillan cheek rest. The MSRP is $2899.

Mossberg MVP™ Patrol Rifle

O.F. Mossberg & Sons

The MVP™ Patrol Rifle has been added to Mossberg's Flex line of modular construction products. The MVP has a 16 1/4" medium bull barrel with a flash hider attachment. Twist rate is one in nine inches for the 5.56 NATO, and one in seven inches for the 300 AAC Blackout. Currently, the gun only comes in .223/5.56 NATO and .300 AAC Blackout, but, later this year, it will be chambered in .308 Winchester (7.62 NATO) with a one in ten twist rate. The guns range in weight from six and three quarter pounds to eight pounds, depending on caliber and whether or not a three to nine power illuminated scope is included.

Supplied sights (except for the 300AAC) are a raised platform, rear adjustable rifle sight on the barrel and a fiber-optic front blade. A Picatinny-style scope base is standard. A ten round magazine is supplied, but AR magazines can be used. The stock is polymer with sling mounting studs; the patented LBR Adjustable Trigger is present. This rifle is also available in non-Flex mode. The MSRP should be under $500.

Colt® Defense, LLC

Based on the successful Colt Rail Gun®, Colt is fulfilling its bid to build 12,000 1911 pistols for the United States Marine Corps, formally identified as the Colt Marine Close Quarter Battle

THE BATTLE OF THE BLACK SEA
MSG PAUL HOWE'S UNTOLD STORY OF
BLACK HAWK DOWN

On October 3, 1993 a group of US Rangers and Special Operations soldiers set out on a mission into the heart of the Bakara market in Mogadishu. What started as a mission that should have lasted 30 minutes turned into a battle for their lives. Known by these men as the Battle of the Black Sea and later portrayed in the motion picture Black Hawk Down, here is the untold story of that battle as told by Delta Force member MSG Paul R. Howe, retired.

DVD Blu-ray Disc STREAMING

Circle 2035 for More Information

Pistol. The Rail Gun has been customized with a Cerakote™ finished stainless steel frame and slide rendered in Desert Tan, and it has been fitted with Novak® Night Sights. A flat mainspring housing with lanyard loop, ambidextrous safety and National Match barrel fill out the package. As to being available for civilian sales, I think it will be, eventually, but only after Colt completes the USMC contract which might be a while.

The G30S from GLOCK®

GLOCK®, Inc.

GLOCK introduced the Model 30S in .45ACP which is the Model 30SF (Short Frame), using the single column 36 slide on the 30SF frame (which makes it easier to conceal). The 30S holds ten rounds, as do the Models 30 and 30SF. I understand the new Model 30S will now fit in a holster made

Kahr Arms Model CW380, chambered in .380ACP

for the GLOCK Model 19 – a standard-sized pistol in 9x19mm.

Also, the 10mm chambered Model 20 has had the Gen 4 treatment and now has a smaller grip, along with two additional backstraps.

Kahr Arms

Last year, the Model P380 was well received, but was still priced a bit higher than some other competitors' offerings. Kahr's new Model CW380 has the same cosmetic modifications done to it as were applied to other Kahr pistols (such as a conventional rifled barrel instead of the match grade polygonal barrel), resulting in an MSRP of $419, but now a spare magazine must be an additional purchase. The CW380 pistol has a 2.58" barrel, an

Kimber Master Carry Ultra™, with Crimson Trace® Lasergrip® in .45ACP

overall length of 4.96" and a height of just 3.9". It weighs 10.2 ounces (without a magazine) with a black polymer frame and has 4140 steel inserts molded into the front and back of the frame for added rigidity.

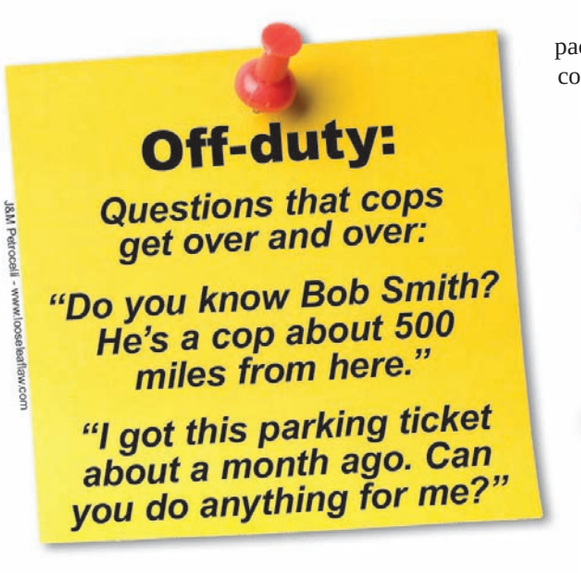
Kimber Mfg., Inc.

Kimber has a new "Master Carry™" line of .45ACP pistols, featuring concealed carry features. This three pistol series has Tactical Wedge Tru-Dot® night sights, Round Heel Frames, serrated mainspring housings and Crimson Trace® Master Series' Lasergrips®, match-grade stainless steel barrels and steel slides with the self-lubricating KimPro® II finish.

The three .45ACP pistols include the full-size

Circle 2036 for More Information

Circle 2037 for More Information



Master Carry Custom with stainless steel barrel, slide and frame, recessed slide stop pin and rounded edges; the Master Carry Pro™ with four inch stainless steel bull barrel and aluminum frame; and the Master Carry Ultra™ with a three inch stainless steel bull barrel and an aluminum short grip frame. Master Carry pistols have a suggested retail price of $1,531.

Kimber's Micro .380 ACP pistol first debuted at the 2012 SHOT Show, but, apparently, it never made it into 2012 sales. This year should be the charm. The 1911-style pocket pistol has a stainless steel slide, steel sights in dovetail cuts and ample ejection port. The 2.75" barrel is also stainless steel and the frame is alloy with a beveled magazine well. The thumb safety, slide release and magazine catch are left side frame mounted and it has an exposed hammer. It weighs less than 14 ounces with the supplied six round steel magazine. An extended seven round magazine is an additional purchase. The MSRP begins at $652.

North American Arms Sidewinder revolver in .22MRF and .22LR, shown with conversion cylinder

North American Arms (NAA)

The NAA Sidewinder revolver is simplicity itself. It is single-action with a spur trigger and chambered in .22MRF (Magnum Rimfire) with an optional conversion kit to use .22LR.

The stainless steel Sidewinder has a swing out cylinder on a frame mounted crane. To open this cylinder, pull forward on the cylinder pin. The cylinder should be able to be moved to the right. Now, pushing rearward on the cylinder pin moves an ejection "star" which extracts all rounds. A bead front sight and Rosewood grips complete the package. The MSRP is $349; $389 with the .22LR conversion cylinder.

Remington® R1™ Carry in .45ACP

Remington® Arms Co., Inc.

Remington has expanded its 1911 line with the R1™ Carry. The slide is now shortened to 4.25" on its steel frame and chambered in .45ACP. The Carry has a satin black oxide finish and the slide is dehorned with a Trijicon tritium front sight and a Novak rear sight. The beavertail grip safety has a 25 LPI checkered memory bump and the front strap and mainspring housing are also checkered 25 LPI. There's an ambidextrous thumb safety, beveled magazine well and an aluminum match trigger.

The Carry ships with one eight round and one seven round magazine. The barrel is match-grade stainless with target muzzle crown, wears partially checkered cocobolo grips and has an MSRP of $1,299.

Sturm, Ruger & Co., Inc.

Ruger has a few new handguns. There's a Commander-sized Ruger SR1911 in .45ACP with an MSRP of $829 and the (new last year) LC9 pocket

Ruger Model SR45, chambered in .45ACP

semiauto in 9x19mm is now also chambered in .380ACP. Per Ruger, the thought is that with the slightly larger size and weight of the LC platform, felt recoil of the .380ACP is lessened. It has an MSRP of $440.

Ruger has also taken its SR9, chambered in 9x19mm, and altered it to accommodate the .45ACP round for those who want this DA/SA pistol in the larger caliber. The SR45 is available with alloy steel slide and black nitride finish, or a stainless steel slide with brushed stainless finish. It has an overall length of eight inches, carries 10+1 rounds, and offers customizable options such as an ambidextrous thumb safety and magazine release button. Its reversible backstrap also allows it to better fit your hand. The MSRP is $529.

Ruger continues with its LCR revolvers, now offering the chambering of the .22MRF cartridge. The .22MRF LCR is offered with or without a Crimson Trace Lasergrip, with an MSRP of $799 and $529, respectively.

Springfield Armory USA®

Springfield is changing calibers on one of its popular pistols. The XD-S™, introduced last year chambered in .45ACP, is now offered in 9x19mm.

Saving Money by Cross Training (or Even Consolidating) Police, Fire Services

Basic Life-Support (BLS) equipment, fire extinguishers and first-aid equipment are in most police cruisers' trunks, as police officers are often first on the scene of medical and fire emergencies. However, training firefighters is gaining ground in cash strapped communities. Sunnyvale (CA) cross trains all sworn personnel for law enforcement, firefighting and emergency medical services, and a number of other communities are considering the same. Cross training currently exists in at least 130 other communities across the nation.

The benefit: Just as a BLS trained officer can save a life in the first crucial minutes of a medical emergency, a police trained firefighter can preserve potential crime scenes. And, when violent crimes require fire or emergency medical services, police trained firefighters can go into action much sooner than conventional firefighters could. Shared building schematics help both fire fighting and policing operations; all emergency workers share a headquarters, administration and dispatch center and, as a result, there are few miscommunications. Although training costs are higher, overall public safety spending is much less than in other Bay Area communities.

On the flip side, each job's psychology is different. Police officers do not act (or make decisions) as teams the way firefighters do and the skill sets are entirely different. As a result, many communities with cross trained emergency personnel have focused on administration or certain units.

One type of unit which many chiefs believe lends itself to cross training: SWAT. SWAT trained firefighters, or tactical emergency medical professionals, enter critical situations alongside police when medical care is required – for instance, during hostage situations. In use for years in communities such as Clearwater (FL), Salt Lake City (UT) and Miami-Dade (FL), Tactical Emergency Medical Specialist (TEMS) programs are catching on in communities like Wausau (WI), where five firefighter paramedics recently went through the training.

The idea is to get medical aid to injured people, including SWAT team members, much more quickly than would otherwise be possible when medical personnel must stay out of the red zone. The idea is catching on in some communities following recent mass shooting sprees. TEMS members are paged at the same time as SWAT team members, are outfitted with the same body armor and other tactical gear, and enter scenes right behind SWAT officers. Some may even be armed, although they currently are not in Marathon County (WI).

"Our Chief of Police approved the Nate Squared Tactical Professional holsters and they are now standard issue for undercover detectives. This holster had all the elements required for use in plain cloth scenarios. It's concealable, comfortable, and durable. It provides both re-holstering capability and weapon retention. I use the holster for my off duty carry and can honestly say that this product is phenomenal. I have never worn a more comfortable holster. I recommend it to anyone who asks about a concealable holster. And the fact that it is American made is a great thing too."
Officer Luis D. Castro "Lou"

Springfield Model XD-S™, chambered in 9x19mm

The changes to the XD-S are that its magazine capacity increases to seven over five and its weight is 23 ounces to the 21.5 ounces of the .45ACP (although both pistols share the same dimensions). The XD-S continues shipping with a pair of magazines, polymer holster and magazine carrier, along with a magazine loading tool. The new XD-S should be at dealers before midyear. The MSRP is not firm, but is reported to be in the neighborhood of $599.

Walther Arms, Inc.

Walther (no longer a subsidiary of Smith & Wesson) introduced the PPX, an affordable hammer fired, semiautomatic pistol ($449) which comes in 9mm and .40S&W, in a choice of either black or stainless. According to Walther, it has a constant trigger pull of just 6.6 lbs, with a reversible magazine release. This double stacked pistol has a magazine capacity of 16 rounds for the 9mm version and 14 for the .40S&W.

Walther has also chambered its centerfire Model PPK/S® pistol in .22LR, thus providing an excellent training pistol for users of the PPK/S or just plain shooting fun. The .22LR PPK/S is six inches in length and weighs 23 ounces. The magazine capacity is ten rounds and the MSRP is $329 in black and $419 in nickel.

Final Thoughts

Long or short gun, there's no lack of new stuff for most any law enforcement or civilian need. Reality, though, is that some new products never get past being "vaporware" due to lack of interest by potential buyers at the SHOT Show. If interest is favorable, the next hurdle is availability. I suggest that, right now, this is somewhat guesswork for even those who have been most reliable in their estimates, as anecdotal reports indicate any defensive handgun – and most any military, or quasimilitary, style long gun – is being bought as soon as they are in stores. However, this could change at any time depending on what happens with government regulations.

I read more than one report from otherwise reliable sources that the Russian Mosin-Nagant bolt-action rifle, an arm of the former USSR and its satellite countries which was first used at the beginning of the 20th century, is selling briskly, as are simple semiauto .22LR rifles. And, ammo companies simply cannot meet demands for the most popular calibers, let alone those less often sought.

All of this would indicate current products are going to be made in advance of new products. My suggestion is, if you find what you want, buy it right then. Don't dither. By the time you leave, decide (and get your better half's okay), and go back to get the gun or the ammo, either or both will most likely be gone.

The new buying frenzy is claimed to exceed any such since the Gun Control Act of 1968 and with no signs of receding. (Despite rumors to the contrary, I was not around for the 1934 National Firearms Act, but I didn't miss it by much!)

NEWS

Are You Being Trained to Care for Your Body Armor?

Even though most law enforcement agencies in a Police Executive Research Forum (PERF) study have corrected their policies to mandate body armor, many still do not train their officers on adequately caring for their armor. The most recent study of 1,000 sworn officers around the nation found that, while more than 92% are required to wear armor most of the time or at all times on duty – an increase of more than one third from a similar study done three years ago – nearly two thirds of the surveyed officers didn't know that moisture could reduce body armor's protective strength. More than 57% store their armor on regular clothes hangers rather than laying it flat or using hangers designed for body armor. This increases the risk that ballistic material will move or bunch, leaving some parts of the body vulnerable. PERF recommends improved training and education, along with lockers which accommodate appropriate body armor storage.

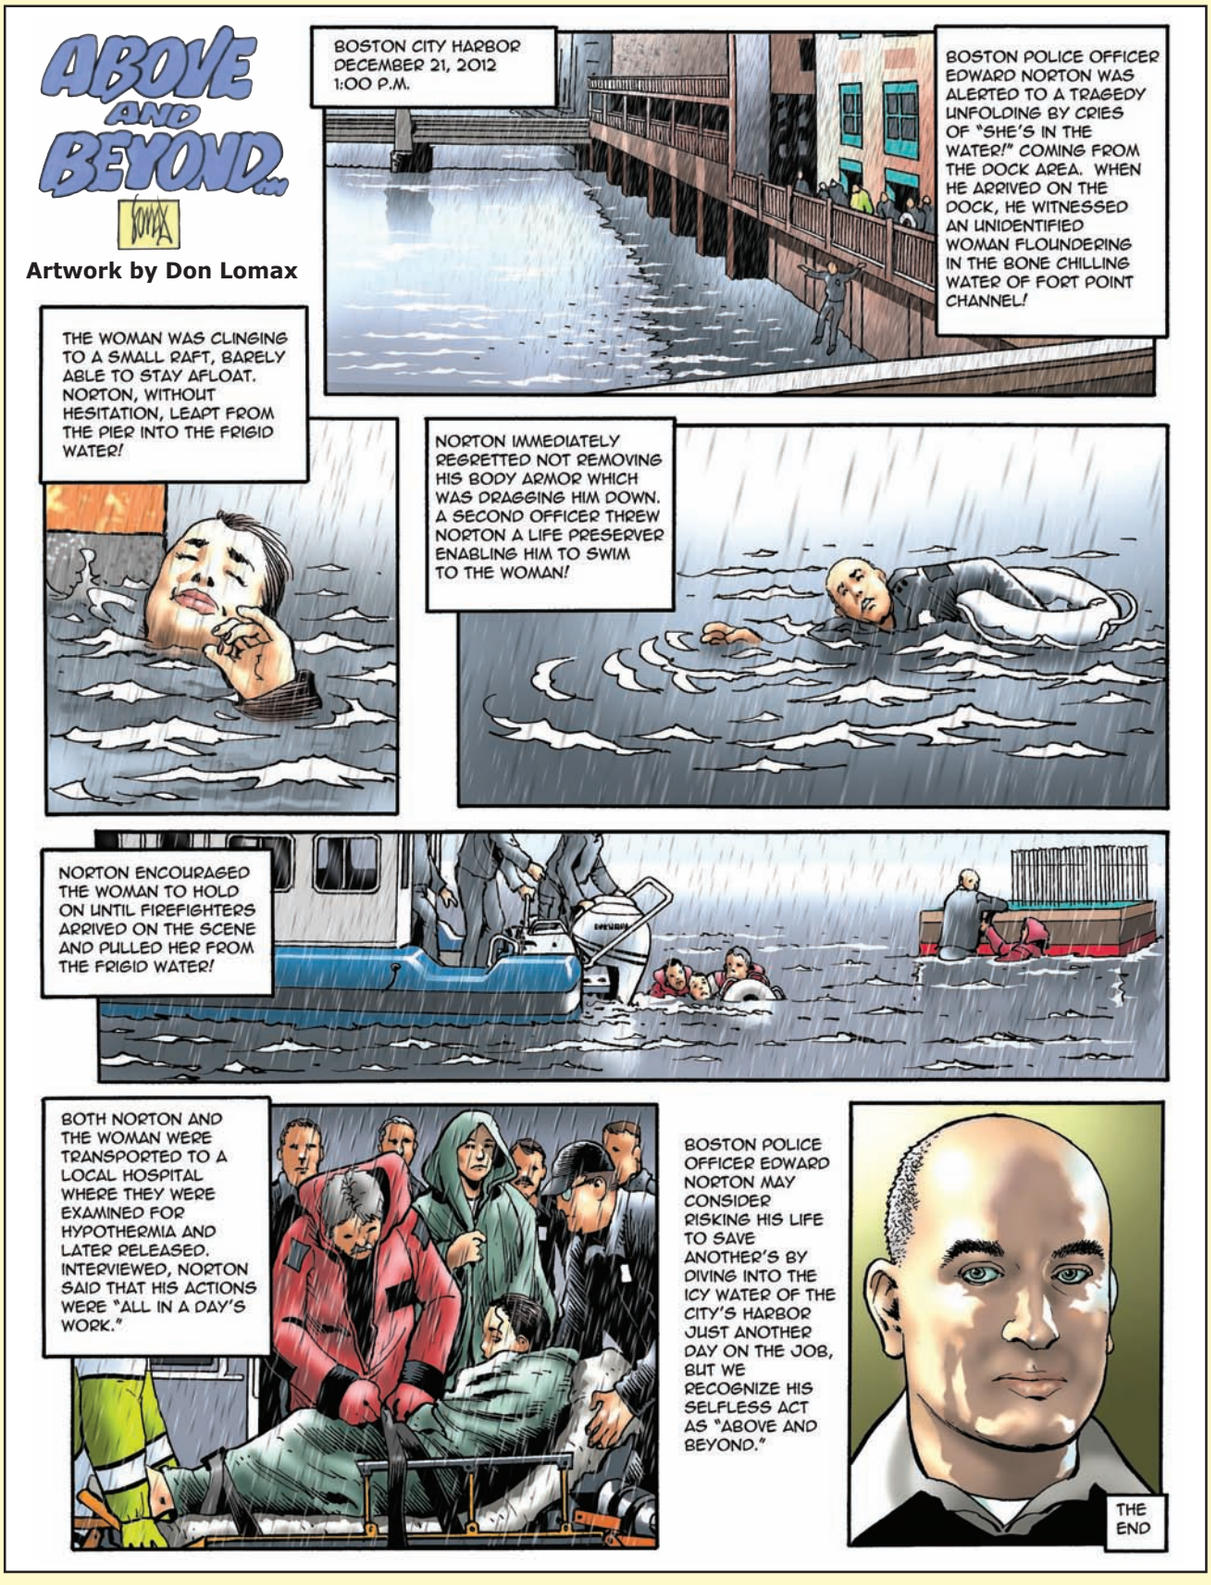
Above and Beyond...

HONORING THOSE WHO TAKE RISKS AND SAVE LIVES

"Above and Beyond..." salutes Officer Edward Norton of the Boston, MA, Police Department



Artwork by Don Lomax

"Above and Beyond..." Sponsored by Original S.W.A.T. Footwear Co.

ORIGINAL S.W.A.T.®
TACTICAL FOOTWEAR

Do you (or someone you know) deserve special recognition for answering the call of duty while ignoring your own personal safety? *Police and Security News* and Original S.W.A.T. want to know!

Upon acceptance, these actions will be highlighted in an illustrated format and published in a future edition of *Police and Security News*. Additionally, a digital file of the published artwork will be presented free of charge to the individual or department/agency as a remembrance. AND, the chosen participants – the nominator(s) and the honored individual(s) – will each receive a FREE pair of Original S.W.A.T. Chase 9" Tactical Side Zip boots – compliments of the Original S.W.A.T. Footwear Co.

Nominations for "Above and Beyond..." should be based on the factual rescue of a citizen or the apprehension of a criminal in which the officer(s) demonstrated exceptional courage and bravery.

Submissions should include a brief description of the incident, photos of the officer(s), as well as a letter or E-mail from the ranking officer of the department/agency certifying the nomination.

Please direct all submissions and/or questions to:

Can Lockdown Drills at Schools Reduce Anxiety Over Threats?

Reality-based training is gaining ground in many US police departments because of its ability to better prepare officers for dangerous situations. In schools post-Sandy Hook (and, previously, post-Columbine), lockdown drills are designed to prepare both officers and students for a once unimaginable crime. Students hide in darkened classrooms or closets as teachers close blinds and lock doors, and administrators announce over the PA system that the school is in lockdown.

Some drills even involve mock shooters who yell "Bang!" to simulate bullets or fire Simunition® rounds or blanks from starting guns. In these drills, police in body armor respond as they normally would and scenarios range from active shooters to hostage negotiations. Many schools add lockdown drills to existing plans for fires and other disasters, and practice at least annually. One major change, though, is that districts are now adding elementary schools to their plans – not just middle or high schools.

Although the drills are meant to help students by promoting knowledge of what to do in an attack, improved knowledge doesn't always reduce anxiety or even safety perceptions, even when students and staff are notified in advance about drills. Some administrators refer to less anxiety inducing fire drills when talking to students, and others even make a game out of it by referring to "hide-and-seek."

So, what's the best response? Police may find it through a Department of Homeland Security "whole community" active shooter preparedness program which provides free training and other resources to police, school administrators, parents and others. The training includes information about preincident behavioral indicators and characteristics, whether shooters target schools or workplaces or other locations.

The resources include:

• An Active Shooter: What Can You Do course which guides employees and managers on how to prepare and respond to active shooters. The course runs a full spectrum of incidents, from preincident to incident mitigation. FEMA's Emergency Management Institute is responsible for this program.

• A 90 minute Active Shooter Webinar which helps public and private sector employees develop a response plan and prepare to respond to workplace/school, criminal, or ideological active shooters.

• An Active Shooter scenario-based workshop series, offered in locations throughout the United States and facilitating discussions between private and public sector professionals at all levels of government.

• Active Shooter: How to Respond resource materials, including a desk reference guide, a reference poster, and a pocket-size reference card which describe an active shooter's profile, response planning, training, and preincident behavioral recognition tips. The poster and pocket cards are also available in Spanish.

• An Options for Consideration Active Shooter training video which describes what actions to take when confronting an active shooter: evacuate, hide or even challenge.

• U.S. Secret Service Active Shooter Related Research in PDF format.

• Active Shooter Resources for Law Enforcement and Trainers: Request for Access to Joint Countering Violent Extremism Portal, the result of a collaboration between DHS, FBI, and the International Association of Chiefs of Police. The portal's training material is for law enforcement only.

For more information, see the DHS Web site at **www.dhs.gov/active-shooter-preparedness**.

The Latest and Greatest Technology

The annual SHOT Show® has traditionally focused on promoting new firearms, ammunition, outdoor apparel and related products. However, over the past several years, this event has included a law enforcement section which has grown considerably. Because this event is normally held at the beginning of every year, scores of manufacturers now utilize this trade show to introduce many of their new products. To follow are a number of these new products which we feel are of particular value to the law enforcement community:

New 5.56 Round

The **Optimized™ 5.56mm 62-grain TSX** load, from Black Hills Ammunition, is designed for use in all rifles with a twist of 1/9" and faster, including short barreled rifles. It is flash suppressed for use in low light situations. This load opens up immediately upon impact to over 50 caliber and penetrates to 20" in ballistic gel tissue simulant while creating a wound channel over five inches in diameter.

LaserLyte® .223 Training Cartridge

LaserLyte has recently announced the **LT-223**, a .223 caliber training cartridge. The in-the-chamber design of the **LT-223** allows the user to realistically train anywhere and practice tap, rack, bang or malfunction drills in the comfort of one's own home. The **LT-223** fits inside the cartridge chamber and features a firing pin activated switch which indicates bullet impact with a bright red laser dot. A built-in snap cap protects the firing pin and O-rings hold the laser accurately in place, allowing for repeated dry fire practice without compromising accuracy. The rimless cartridge trainer also allows for constant racking without unintentional ejection.

Circle 2060 for More Information

New Thermal Camera

The **TM-X** 160x120 thermal camera, from Night Optics USA, is compact, lightweight, and ergonomically designed. With features like a removable SD card, video capture, image capture, 2X digital zoom, real-time object tracking, crosshairs, and multiple display color options, the **TM-X** is powerful, sensing extremely minute temperature differences; and is excellent for security, perimeter control, search and rescue, and vehicle identification.

New Duty Boot

Original S.W.A.T® announced a new five inch duty boot for both men and women law enforcement professionals – the **Metro Air 5" WP Side-Zip**. This mid-cut boot is built on a specific last for men, as well as one for women, and is offered in a full-size range for each. It's constructed with a full waterproof bootie, side zipper, and an air cell in the midsole for long-term comfort.

New Premium Scope Line

Colt's Manufacturing Company, LLC has partnered with well-known optics manufacturer Leupold & Stevens to assemble a **co-branded riflescope line** specifically optimized for Colt® firearms and the AR platform. Anchored on the foundation of Leupold's VX-R format, Colt brings two premium scopes to the marketplace: the1.25-4 X 20mm VX-R Patrol and the 4-12 X 50mm VX-R with Fire Dot reticle for critical aim on optics attributes.

Laser Now Available in Infrared

The LaserMax® **Micro™ laser system** is now available in an infrared version for use with night vision devices. For compact and subcompact pistols with a Picatinny or a Weaver rail, the **Micro-IR** requires only one inch of rail space. Features include a battery life preservation mode which switches the laser off after ten minutes and their Controlled Activation™ switch which enables both left-and right-handed shooters to activate the laser.

Circle 2064 for More Information

New Tactical Black Badges

Smith & Warren® has introduced a new **tactical black electroplated finish** which can be applied to any badge. It comes standard in a high shine finish, but can be special ordered in a matte finish for a more subdued look. The **black finish** is electroplated to the surface of the badge – not sprayed or lacquered on to it – making it exceptionally durable, and is covered by their full lifetime warranty.

Circle 2066 for More Information

New Clip-on Night Vision Device

Designed as an intermediate range night sight, the **WASP CNVD**, from TNVC, Inc., is a Picatinny rail compatible, clip-on night vision device which offers clear night vision between 4X and 12X. The **WASP CNVD** relies on a 70mm Catadioptric Lens System which operates at an incredibly fast f/1.14 speed. Powered by a single CR123A lithium battery, sealed in a compartment for weather resistance, it is factory aligned to hold 0.5 MOA or better.

New Thermal Monocular Weapon Sight Kits

American Technologies Network (ATN) Corp. has recently introduced the **Odin-14 Thermal Monocular** as one of the smallest thermal imaging monocular systems currently available. The **Odin-W** can be rail mounted to a light caliber weapon, such as an M16 or M4. The new kit also includes the hardware to mount the **Odin** on a head mount adaptor for hands-free viewing. The Odin Weapon Sight Kit contains the **Odin Thermal Monocular** with a head mount adaptor and weapon mount, head strap, eyecup and ring, an objective lens cap, demist shield, one CR123A type battery, lens tissue and operator manual – all in a soft carry case.

Circle 2070 for More Information

New Uniform Collection

The TRU-SPEC **24-7 Series® ST Collection**, constructed from 6.5 ounce polyester cotton ripstop, includes a pant which is available in big and tall sizing with a length option up to 42". Available as a Pant or a Short, the **ST Collection** offers a traditional cut, an elastic waistband, and a gusseted crotch. Two deep front slashed pockets feature a reinforced bridge at the bottom to securely hold a tactical knife; two cell phone/accessory pockets are located mid-thigh for quick access. The ST Cargo Pant and Short option offers two cargo pockets with a covered flap secured by a bar tack.

Circle 2069 for More Information

New Level 3 Light Bearing Duty Holster

The new **Epoch™ Holster**, from BLACKHAWK!®, delivers three levels of weapon retention for the highest level of security. The retention system engages the pistol's ejection port when holstered and won't let go until you release it. As an added safety measure, the Pivot Guard opens by thumb activation and is designed so it won't close accidentally, locking you out of the holster. This unique design accommodates the most popular under barrel lights on the market today.

Circle 2071 for More Information

New Attachment System

The patented **ZT212-55** is a revolutionary way to attach any drop leg platform to any belt. Designed by 212 Tactical Designs and manufactured by Zak Tool, it replaces standard two inch buckle systems and allows a one-handed way to attach gear without looking. Once attached, it allows for movement in all directions and for multiple pouches to be attached to a single hook.

2013 Buyer's Information Guide

This **Information Guide** is divided into several sections and includes company names, addresses, phone and fax numbers, Web sites and E-mail addresses. Each company has been classified into one or more categories as follows:

(M) = Manufacturer (D) = Dealer/Distributor (S) = Service Provider

Look for these letter designations to the right of each listing. Listings in **red** indicate the company has an advertisement in this issue.

The remaining reference sections are valuable resources which include law enforcement and security related associations and periodicals.

PROTECT YOUR VEHICLE BATTERY
USING 2 SEPARATE TIMING DELAYS

T2 SHUT DOWN TIMER

- Manage power loads separately using 2 independent timing circuits
- Protect vehicle batteries from over-discharge by shutting off either 30A channel (50A max total) at independently preset times after engine shutdown
- The "Override" switch provides up to 15 minutes of operation after the timer shuts down the equipment
- Disconnect occurs independent of timing functions to protect the battery if battery voltage drops too low

To learn more about how Lind's **T2 Shut Down Timer** can meet your specific mobile power needs, contact Lind at **1.800.697.3701**, via email at **info@lindelectronics.com** or visit us online at **www.lindelectronics.com**.

INTRODUCING THE TKL TRAKR™

THE WORLD'S FIRST GPS AND GSM ENABLED ASSET TRACKING AND LOCATING SYSTEM (ATLS)

If you need to keep an eye on an asset - you need the Trakr.™
★Weapons ★Equipment ★Vehicles ★Gear

Simply install the TKL Trakr™ inside one of our patented Pro-Form® cases to keep tabs on your weapon, or attach it to your gear or vehicle. Then use your smartphone along with our TKL Trakr™ ATLS Android or IOS app and you can see where your stuff is at all times.

Use your TKL Trakr™ ATLS app to set virtual boundaries. If your tracked asset moves outside of your defined perimeter, the app will alert you via text, e-mail and a push notification.

TKL Trakr™ … always on duty offering 24/7 Protection®
- only available from TKL Tactical.

TKL Trakr™

TKL Outdoors®
World-Class Cases

www.TKLoutdoors.com // p: 804-749-8300 // f: 804-749-3442

MADE IN THE USA

TACTICAL TKL '84

Pro-Form®

Weapons Transport and Storage Cases

TKL Outdoors® is a Veteran Owned, leading manufacturer of the highest quality weapons and accessory transport and storage cases. We are the leader in custom design cases utilizing our Advanced Interlink Construction® patented foam interior process, which provides the ultimate impact and thermal protection under most circumstances. Our AIC® foaming process allows custom Silhouette™ interiors with a variety of interior fabrics to meet your needs.

All TKL Tactical® cases are manufactured in the USA. In addition TKL Tactical® offers a complete line of tactical clothing and gear.

- *24/7 Protection®*
- *Rugged Providence Forge® Hardware*
- *Military Ready Spring Loaded handles available*
- *Lightweight, Durable Precision Molded Exterior*
- *Non-Locking ¼ turn Military approved latches available*
- *All TKL Tactical® Cases can be customized to meet your Department needs*
- *Exclusive patented Advanced Interlink Construction® form-fitting process for custom Silhouette™ interiors.*

New Owner of AEDEC International

Jatal Inc. dba Accel Plastics, a plastics thermoforming company located in the Pacific Northwest for over 20 years, has announced the purchase of AEDEC International, effective January 2, 2013. Aedec produces a line of prisoner safety seats and vehicle restraint systems under the Pro-Straint™ name. They will continue to support all current products while working to expand the product line.

"They have been an outstanding supplier for many years and their knowledge of our products and business beliefs will ensure a smooth transition," said Dan Corcoran, the previous owner of Aedec.

Accel Plastics will retain all employees and move operations from the Beaverton, OR, facility into the existing 30,000 square foot plant in Auburn, WA.

The company's new contact information is Aedec, 4146 B Place NW, Auburn, WA 98001; phone (503)644-8988; E-mail: info@aedec.com; and Web site: **www.aedec.com**.

FOX TACTICAL PACKS ARE BUILT TO PERFORM EXPERTLY IN THE FIELD. BUT DON'T TAKE OUR WORD FOR IT.

For years, Fox has built innovation and unsurpassed quality into our tactical packs. Quality that means reinforced seams, more modular attachment points and cinch straps where they make the most sense. Our zippers are heavy duty and feature pull tabs. We've added detachable pouches and loop strips for attaching IDs. That's why the National Tactical Officers Association has tested and recommended more Fox tactical packs than ever before. Log on to *FoxOutdoor.com* and look over our line. You'll see why now more than ever, the pros go with Fox tactical packs.

FOX OUTDOOR™

PROUD SPONSOR OF THE NATIONAL TACTICAL OFFICERS ASSOCIATION

THE LEADING DISTRIBUTOR OF TACTICAL, MILITARY AND OUTDOOR GEAR

MILO RANGE WITH KINECT® FOR WINDOWS™
FROM IES INTERACTIVE TRAINING

A New Level of Realism:

MILO Range now features Microsoft Kinect™ options and functionality for a variety of training objectives. MILO Range with Microsoft Kinect™ takes the realism of training, interactivity, and responsiveness to an entirely new level not seen before in Use of Force training systems.

The MILO Range with Microsoft Kinect™ feature enabled can detect and respond to a variety of trainee verbal and non-verbal actions, including:

- Baton swings
- Punches, strikes and kicks
- Defensive and offensive movements and positions
- Customized poses and gestures
- Tactical movement and positions
- Speech and verbal commands

MILO Range with Microsoft Kinect™ can provide real-time adjustments to the scenario and graphics field of view based on trainee movement and position. This interactive, motion-based feature provides innovative training experiences for many tactical applications including corner clearing training, defensive tactics and cover as well as CQM and CQB exercises.

The Microsoft Kinect™ for Windows option can be purchased from IES and added to any MILO Range Pro or Advanced system with MILO Range 4 software.

To find out more about MILO Range with Microsoft Kinect™ or any of our other interactive training systems visit us at: **MiloRange.com** or call **1-800-344-1707**

Do Red Light Cameras Really Improve Traffic Safety?

The premise of red light cameras is to make intersections safer by reducing crashes caused by speeding motorists. However, in many communities, collisions have actually increased at intersections where the cameras are installed. Although this may be due to sudden stops when motorists realize they may get ticketed, there is no way to measure this for certain; nor is there a way to tell whether they are minor collisions compared to those caused by red light violators – either in terms of injuries to people or property. Compounding the problem is that no two intersections are exactly alike, so their engineering, traffic patterns, proximity to cameraless intersections and other factors cannot be precisely compared – even if all municipalities were staffed to complete such complex statistical analysis.

Whether the cameras are even effective is grist for privacy advocates' mills as they argue the cameras are too intrusive. As a result, some communities are seeking ways to improve safety without using the cameras, such as increasing yellow light time. While this can reduce red light violations, it can also jam intersections and raise the risk for fender benders as well. The bottom line is that any community seeking to install red light cameras should make the time to research the solution as thoroughly as possible.

2012 NRA Law Enforcement Officer of the Year

Detective David McCarley
City of Pearl Mississippi Police Department

On May 1st, 2012, a group of Pearl Mississippi Police Department detectives arrived at an apartment in order to serve search and arrest warrants for a suspect wanted for sexual battery and child molestation. After no answer to knocks at the door they announced themselves, entered, and began a slow and methodical search for persons inside. As they reached the master bedroom, they found the suspect hiding in the shower area separated by a wall from the main bathroom. After the suspect repeatedly ignored commands to come out and give up peacefully, Detective Mike Walter decided to attempt to use his less-lethal TASER to safely apprehend the suspect. As he leaned into the bathroom to discharge the TASER the suspect darted out from behind the wall and began firing a handgun. The gunman's first two shots struck Detective Walter in the face and neck and he fell to the floor. The gunman then turned and fired on another officer, Detective David McCarley, with the first round striking him in the right hand as he was bringing his handgun sights to bear on the gunman. The round almost severed his middle finger and destroyed his duty handgun. The next round entered his leg just above the ankle and went completely through his leg. Despite being shot twice and bleeding profusely, Detective McCarley managed to move to the corner of the bedroom and pull a chest of drawers in front of him to use as cover. At the same time, other detectives returned fire while withdrawing to cover outside the bedroom.

The apartment was now a hellish scene with bullet holes in the walls, a thick curtain of gunsmoke hung in the air and because of the noise from the volume of gunfire in the small enclosed area almost everyone was temporarily deaf. Despite being shot, the gunman forced the bedroom door closed and barricaded himself inside with the two gunshot detectives.

After a few minutes, the wounded gunman, now sitting at the foot of the bed, partially regained his senses and took aim at Detective McCarley after he saw that he was still alive in the corner of the bedroom. Even though wounded and under the threat of immediate death, Detective McCarley calmly managed to begin a dialogue with the shooter and assured him that a surrender resolution was still a possibility. The gunman's attention became distracted from Detective McCarley because he was trying to look at responding officers outside the bedroom window and by the abandoned police radios blaring on the bedroom floor. Detective McCarley saw the gunman's distraction as an opportunity to begin moving inch by inch towards his fallen comrade in order to give him aid.

The shooter, realizing that Detective McCarley had almost made it across the room, began screaming at him and threatened to kill him. Detective McCarley managed to convince the suspect that he only wanted to check on his wounded friend. Fortunately, the gunman was distracted again by officers outside the apartment and the scream of sirens from responding emergency vehicles, so Detective McCarley decided to risk his own safety and, once again, began to move toward the wounded detective. When he reached him, there were no vital signs and Detective McCarley knew his friend's only chance to survive depended on his ability to receive immediate medical attention. He also found that Detective Walter's handgun was still in his holster.

As time passed, the gunman became more distracted and outraged by the responding officers outside the apartment and the detectives just outside the bedroom door. Taking full advantage of the gunman's distraction, Detective McCarley moved his body in an attempt to block the shooter's view and pretended to render first aid to the fallen detective while actually easing his friend's handgun from the holster using his severely injured gun hand. Although he managed to successfully draw the handgun, he knew it would be impossible to grip and fire the gun with his normal shooting hand since it had been shot and would have to use his support hand instead. Despite the fact that the shooter continued to glance at him every few seconds Detective McCarley was able to slowly move the pistol onto his partner's chest and rotate it enough in order to get the handgun into his support hand.

Using his last bit of energy and willpower, Detective McCarley whirled around and began to shoot at the gunman. Seeing the rapid movement in his peripheral vision the gunman turned and also fired but one of Detective McCarley's rounds struck the gunman squarely in the head and the gunman fell dead.

Detective McCarley then called out to the detectives outside the bedroom, who rushed in, secured the scene, and rendered immediate medical assistance. Although CPR started Detective Walter's heart again, he tragically passed away shortly after being airlifted to the trauma center. Detective McCarley has since returned to duty, but continues to undergo reconstructive hand surgery and physical therapy.

Detective McCarley willingly took grave risk to his own life in order to aid his fallen comrade. His ability to remain cool headed and to form a tactical plan that quickly ended the gunman's actions ensured the safety of both his fellow officers and the apartment building's residents. His heroic actions under stressful and confusing circumstances is a credit to him, his department, and the community he serves and are in keeping with the highest traditions of law enforcement. As such, it is with great honor and pride that the National Rifle Association names Detective David McCarley, of the City of Pearl Mississippi Police Department, as the 2012 NRA Law Enforcement Officer of the Year.

Scan this code with your smartphone or tablet to get more information about the NRA Law Enforcement Officer of the Year recognition.

Forms for nominating candidates for the NRA Law Enforcement Officer of the Year Award may be downloaded at http://le.nra.org/documents/pdf/law/leoy.pdf.

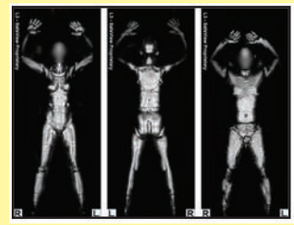
"T-Ray" Detects Concealed Weapons Beneath Clothes



The New York City Police Department (NYPD) has a new tool which detects concealed firearms – even underneath layers of clothing – by the way they block naturally occurring terahertz radiation from the human body. The "T-Ray" can be mounted on a tripod or vehicle and deployed in locations with high incidences of gun violence. Eventually, they hope it will be small enough to wear on a belt.

To develop the device, the NYPD worked together with the London Metropolitan Police and Digital Barriers, the T-Ray's manufacturer, using US Defense Department funding. The device is seen by privacy advocates as a way to maintain public safety without having to resort to the controversial "stop and frisk" practice. Others, however, express concern over whether it might identify "false positives" as weapons when they really aren't. The NYPD is working with lawyers to figure out how best to deploy the T-Ray within Constitutional protections.

NEWS

How the Illusion of "Looming" Leads to Deadly Force Against Vehicles

Police officers who have fired at oncoming vehicles – even those moving at a slow rate of speed – face skepticism when they later report that they were in fear for their lives. But, the reason so many don't simply "jump out of the way" lies in their own perception of the oncoming vehicle: the looming threat of a vehicle which visually doubles in size for each half of the gap it closes between them.

That perception can give an officer the sense that there is no time to jump clear. Shooting starts when the officer's training kicks in to resolve an imminent deadly threat. Meanwhile, however, bystanders may report a more accurate account of the approaching vehicle's speed; not experiencing the same visual effect as the officer, they see a vehicle which remains the same size as it moves.

Documenting these effects is underway at the Force Science Institute, where research should help police better investigate officer involved shootings with vehicles, and help involved officers testify more accurately in court.

"Sextortion" Scams Sexually Explicit Images from Victims

"Sexting" can land teens and adults alike in hot water when they don't realize the consequences of sending or receiving nude images and other content via mobile device. But, while sexting isn't always criminal activity (unless it involves an underage participant), sextortion is.

A sextortionist obtains sexually explicit still images or videos from victims via E-mail and/or social media, usually posing as someone from their demographic to persuade them to send the images or pose in front of their Webcams. Sometimes, a sextortionist even hacks victims' E-mail, Skype, Facebook or other social accounts to gain access to their friends, posing as someone they trust. The sextortion happens when the offender uses the images to coerce victims into continuing to pose nude, often by threatening to send the images and any explicit messages to teachers, colleagues, friends or family members.

Both identity theft and computer intrusion can be charges in such cases, along with child pornography manufacturing if victims are underage, and interstate extortion if that applies.

Setina Manufacturing Company Celebrates 50 Years

Setina Manufacturing Company, Inc. was founded in 1962 by John R. Setina who had 17 years of previous experience as a vehicle repair specialist with the Washington State Patrol Automotive Division. Mr. Setina had also owned his own body repair business when the State Patrol recognized his expertise and recruited him.

While performing his duties in designing and building roll bars for the Washington State Patrol Cadet Driver Training Program, Mr. Setina saw the need for officer protection while transporting prisoners, as well as the need to reinforce the vehicle in the event of an accident.

With Mr. Setina's extensive background in vehicle body repair and his knowledge of vehicle structure, he designed the first Setina product.

Bodyguard Police Vehicle Protection

Bodyguard Partitions incorporate a roll bar type framework with various polymer window configurations. Mr. Setina applied for his first patent in 1963. That was the first Police Vehicle Partition Patent of its type awarded by the US Patent Office. Since that original patent, John and Terry Setina have been awarded many other patents in the nearly 50 years of designing and manufacturing law enforcement vehicle equipment.

Setina Manufacturing Company, Inc.

Setina Manufacturing Company, Inc. has very strong leadership. Terry Setina, President, and Judy Setina, Vice President, have both been an integral part of the company for over 30 years. Setina is the original manufacturer of law enforcement vehicle partitions and their designs continue to set today's industry standards.

For more information, contact Setina Manufacturing Company, Inc., 2926 Yelm Hwy. SE, Olympia, WA 98501; phone (800)426-2627; E-mail: setina@setina.com; Web site: **www.setina.com**.

Continuing Education for Law Enforcement - Part Two

Rebecca Kanable

In Part Two, *Police and Security News* examines how to make wise investments when deciding where to go, what types of degrees might be beneficial, costs, and other important considerations.

The decision of whether or not to pursue a bachelor's or a master's degree is a personal one. "You have to do it for yourself," advises Paulette Laubsch, DPA, Associate Professor at Fairleigh Dickinson University. FDU was established in 1942 and is New Jersey's largest private university with students worldwide.

As discussed in "Continuing Education for Law Enforcement – Part One," the benefits of obtaining a college degree are many, but they do not come easily. The time, effort and, likely, the money officers invest will be their own. In Part Two, *Police and Security News* examines how to make wise investments.

Where Should You Go to School?

Prospective students should do their homework, both on the school and the program they're interested in, says James Henderson, who chairs the College of Criminal Justice and Security at the University of Phoenix Southern California Campus. University of Phoenix, a private university offering courses online and at more than 100 locations nationwide, was founded in 1976 to provide working adults with higher education options at convenient class times.

"It's okay to ask questions," says Henderson, a former master police officer with the Palm Springs, CA, Police Department and a U.S. Army veteran. "Every school will have someone with whom you can inquire. Make an appointment with the enrollment advisor. Find out exactly what it will take to get a degree."

That is true whether prospective students will be learning online or in the classroom. Most importantly, he says, students should be confident and comfortable with the program and school they choose.

Charles Nemeth, J.D., Ph.D., LL.M, at John Jay College of Criminal Justice, suggests criminal justice and security professionals can begin by factoring out the Ivy League schools.

Elite universities generally do not offer criminal justice or security administration programs, explains Nemeth, Chair and Professor of Security, Fire and Emergency Management and Director of the Center for Private Security and Safety. Nemeth cautions the for-profits which are corrupt should be avoided. These "diploma mills" have aggressive recruiting, especially among veterans, says Nemeth, a father with two sons in the military. "They charge an extraordinary amount of money and their degrees have no pedigree or value over time," he continues. "People graduate from these for-profit institutions owing $100,000 to $200,000 and just as much at the graduate level. It borders on fraud and corruption."

While criminal justice and security professionals do not require a degree from Stanford or Harvard, Nemeth suggests they do require a degree from a reputable institution. He encourages criminal justice and security professionals to attend state universities or private colleges which are reasonably priced.

Prospective students also should look for programs which fit what they want to do. Laubsch says the question to answer is really, "What do you want to do when you grow up?" and the answer, especially for those approaching retirement, may not be criminal justice.

Jeffrey Magers, Ed.D., Associate Professor in the Professional Studies Department, Law and Public Policy/Homeland Security/Criminal Justice, at the California University of Pennsylvania, says prospective students should look at the reputation which a school has specifically for their field of interest. CAL U, founded more than 160 years ago, is a member of the Pennsylvania State System of Higher Education. "It might be better to go to a less prestigious university which is highly regarded for that major," he says.

How Do You Know if a School Is Reputable?

Accreditation helps determine if a school is reputable and should be at the top of selection criteria, according to university representatives with whom *Police and Security News* spoke.

The Council for Higher Education Accreditation (CHEA) explains, "accreditation is review of the quality of higher education institutions and programs. Accreditation is a way that students know that an institution or program in the United States provides a quality education."

CHEA says that whether a college, university or program is accredited is important because:

Online Undergraduate, Graduate & Certificate Studies in

Public Safety & Homeland Security

Meeting the professional advancement needs of those committed to protecting the public.

Earn your career credentials without job interruption through Fairleigh Dickinson University's respected online degree and certificate offerings. Established in 1942, FDU is New Jersey's largest private university with 12,000 students worldwide.

Degree Offerings

- **Master of Administrative Science**
- **Master of Science in Homeland Security**
- **Bachelor of Arts in Individualized Studies**

Certificate Studies

Career-relevant programs are available at the graduate and undergraduate level in such areas as **terrorism, forensics, global security, disaster and emergency management, transit safety, homeland security,** and more. Credits earned can be applied toward the appropriate degree program.

- FDU is proud to participate in the Yellow Ribbon G.I. Education Advancement program enabling eligible veterans to attend FDU at no charge.
- FDU accepts Federal Tuition Assistance (FTA) for undergraduate and graduate courses (*restrictions apply*).
- No entrance exams required.

Advice from a Chief

Chief John Dyer of the Rifle, CO, Police Department, an advocate of higher education for law enforcement, tells officers to look at their long-term goals and go from there.

If their goal is to be a police chief, he tells them to look at the qualifications listed in job openings and research in newspaper articles the educational backgrounds of winning police chief candidates. Education will be one of those qualifications, and sometimes bachelor's or master's degrees will be specified.

Within the police department, Dyer also suggests working with an educated command staff mentor.

Start slow, he says. "Take one class and see how it fits with your life," he says. "Are you comfortable with the level of work? Does it fit with your family and work life?"

Dyer says he's seen many people start with full course loads, who then find out that it is way too much.

• Students who want federal (and sometimes state) grants and loans need to attend a college, university or program which is accredited.

• Employers ask if a college, university or program is accredited before deciding to provide tuition assistance to current employees, evaluating the credentials of new employees or making a charitable contribution.

• The federal government requires that a college, university or program be accredited in order to be eligible for federal grants and loans or other federal funds.

• State governments require that a college, university or program be accredited when they make state funds available to students or institutions and when they allow students to sit for state licensure examinations in some professional fields.

The "gold standard" of CHEA accreditation is regional accreditation, Magers says. He acknowledges, "That seems counterintuitive. You might think of national accreditation as the best, but it's not."

Magers notes some for-profit colleges and universities have been under considerable scrutiny from members of Congress who are questioning their practices, high tuition and low graduation rates. Some of these schools have not had regional accreditation, he points out.

It should be noted there also are national faith-related and career-related accrediting bodies and programmatic accrediting organizations recognized by CHEA. To view a complete list of CHEA and U.S. Department of Education recognized accrediting bodies, see **www.chea.org/pdf/CHEA_USDE_AllAccred.pdf**.

For most police officers, Magers advises, "Only look at institutions which are regionally accredited." Henderson says, "That's definitely important because you do not want to invest the time and money in a program or degree and later find out that it may not be recognized by employers."

To help people shopping for schools, various entities provide school rankings. Among the most popular is *U.S. News and World Report*'s ranking of schools and online programs. See **www.usnews.com/rankings**.

The U.S. Department of Education in February released an interactive College Scorecard which helps students make smart decisions about where to enroll for higher education. The College Scorecard provides students and families with clear information through an interactive tool which lets them choose among any number of options based on their individual needs – including location, size, campus setting, and degree and major programs. Each Scorecard includes five key pieces of data about a college: costs, graduation rate, loan default rate, average amount borrowed, and employment. You can access a College Scorecard at **whitehouse.gov/scorecard**.

A Word of Caution

The Council for Higher Education Accreditation cautions that, in their quest for higher education and training, students in the United States sometimes encounter "diploma mills" – dubious providers of educational offerings or operations offering certificates and degrees which are considered bogus. Questions to ask to help avoid diploma mills and accreditation mills can be found at **www.chea.org/pdf/fact_sheet_6_diploma_mills.pdf**.

What Is the Cost?

Costs can vary greatly among schools. Officers who are interested in obtaining a degree should investigate the cost, says Jeff Kuhn, Associate Vice President, Public Safety Markets, at American Military University (AMU). AMU, a private online institution founded in 1991, is part of the regionally accredited American Public University System and offers a variety of public safety degree and certificate programs.

Generally, Kuhn says, the cost of obtaining a degree online will be less than obtaining a degree on campus. Kuhn adds that the average annual full-time cost of obtaining a bachelor's degree at AMU, including books and fees, totals only about $8,000, compared to nearly $10,000 at public, in-state schools and nearly $14,000 at other online institutions.

For a bachelor's degree, Nemeth says a $20,000 to $25,000 loan makes sense. At the graduate level, he says a $20,000 to $40,000 loan likely can be paid back quickly. "A graduate degree pays back almost a hundredfold over your lifetime," he says. "It's probably the best investment that a criminal justice or security practitioner could make because it helps an officer move up the ranks and gives officers more flexibility in their lives. We're finding that, in most major urban areas, you need a master's degree for any supervisory or managerial position in policing or security."

More policing functions are moving in the direction of privatization which means there's enormous opportunity for educated police officers, he adds.

"The corporate world has a different mind-set," he says. "It's not a civil step system, it's an entrepreneurial competitive system. If you want to get ahead, you've got to be well educated."

After working on the street for 20 years, many officers want to work with young people and impart their knowledge, Nemeth says. As someone who does the hiring for his department, Nemeth looks for adjunct professor candidates with master's degrees. Teaching part-time or at a community college or smaller school is another way a master's degree will pay off.

College Credits for Life Experiences

Officers may be able to lower their tuition cost by obtaining credit for life experiences. The National Center for Education Statistics defines credit for life experiences as credit earned by students for what they have learned through independent study, noncredit adult courses, work experience, portfolio demonstration, previous licensure or certification, or completion of other learning opportunities (military, government or professional).

Kuhn says, "Many schools, particularly in the online environment, are willing to give officers 15 to 30 credits which is traditionally a full year of college for completing basic training."

Someone who has taken military police training also may be eligible for about 30 credits, he says.

Those who have completed the FBI National Academy Associates' executive leadership management program and other programs like these can receive credit hours.

The American Council on Education publishes a guide to help universities equate life experience with college credit.

At John Jay, Nemeth says a faculty team following the guide conducts a relatively extensive review of students' experiences and will give students up to 21 credits. He says 12 to 15 credits is relatively common.

While the number of college credits given based on experience will vary from one university to

Circle 2141 for More Information

Back to School Checklist

- Is the school regionally accredited?
- Does the school have a good reputation?
- Does the academic program have a good reputation?
- Is the tuition reasonable?
- Does the school have full-time faculty members?
- Who teaches the courses?
- Is the school under investigation by the Department of Education?
- Are there academic requirements to get into a program? (There should be.)
- How large are the class sizes?
- How often is the instructor engaged with students?

another, Kuhn notes the Department of Education requires students to complete the last 25 percent of their course work at the school which confers their degree. If 120 credits are needed to complete an undergraduate degree, up to 90 credits could be transferred.

Police officers who have no college credits may want to consider starting at a community college which, typically, will be less expensive. "Community colleges have all age groups," Laubsch said. "It's not just kids anymore. They're a good place to get your feet wet and see how you do before you spend a lot of money."

Financial Help

Kuhn outlined several options officers might have available to help them pay for their education. "Probably the most desirable [option] is if their agency has a tuition reimbursement benefit," he said. "Some agencies offer partial reimbursement and pay a percentage of tuition."

Hiring and Retention of State and Local Law Enforcement Officers, 2008 – Statistical Tables (**http://bjs.ojp.usdoj.gov/index.cfm?ty=pbdetail&iid=4514**), published in October 2012, looks at tuition reimbursement as a recruitment incentive:

• About one in two state law enforcement agencies offered college tuition reimbursement to new recruits in 2008, compared to one in four local police departments and one in eight sheriffs' offices.

• A majority of local police departments with 25 or more officers used this incentive.

After looking first at possible agency benefits, police officers should look for opportunities outside their agency. Organizations such as the Fraternal Order of Police may have scholarships for which officers could apply. Kuhn says receiving a scholarship could help cover a course or two. At the state and local level, he says a police foundation or charitable group may be willing to help pay for education expenses.

Officers with military experience should see if they are eligible for VA benefits including scholarships, grants and even full tuition.

In addition to those options, officers can look at the financial options which are available to college students based on income and expenses. The U.S. Department of Education has several kinds of opportunities, including grants and low interest loans, for which students can apply. The Free Application for Federal Student Aid (FAFSA) is available at **www.fafsa.ed.gov**.

If officers belong to a credit union, they may be able to obtain a low interest education loan which is lower than, or the same as, the federal government loan's interest rate.

Many universities (via their Web site) will help students better understand costs and financial aid. For example, the University of Phoenix Web site has an online financial calculator.

Fast-track/Accelerated Degrees

Fast-track or accelerated degree programs allow students to complete their degrees in a shorter period of time. Accelerated bachelor's/master's degree programs may allow students to use graduate courses taken as an undergraduate toward both the undergraduate and graduate degrees. By doing so, the time required to complete both bachelor's and master's degrees is less.

Nemeth suggests fast-track programs work better at the graduate level. Traditionally, a master's which is earned in 24 months may instead be earned in 15 to 16 months. Instead of 15 weeks, courses might be eight weeks.

Online vs. Classroom

Online programs are becoming more and more popular, and schools are responding to the demand for accessible education. In an online environment, people think they can take a class and do the work when they want. "That's true," says Laubsch, who designs online courses, "however, they have to dedicate the time."

Laubsch says a rule of thumb is the time a student would otherwise spend in a classroom should be comparable to what a student dedicates to an online class. "Students have to be disciplined enough to do the work when it is expected to be done," she emphasizes.

Obtaining a degree from your own home provides many comforts. If students are unsure about how to answer a discussion question, Laubsch says the online environment affords them the time to research the answer before contributing to the discussion.

Yet, students do need to contribute. They can't hide from an instructor like they might be able to do in a classroom with lots of students. Online instructors can tell when students go online and how much they contribute to discussions. At Fairleigh Dickinson, students might have 35 questions to respond to in a ten week period. They also must respond to others' answers. Typically, the school limits online classes to 25 students or fewer.

For the adult learner, the idea of going back to school can be intimidating. Not only might students be considerably younger, Kuhn says, they may not share the same values and ideals. The online option has made learning less intimidating in this regard.

Henderson says each person learns differently. While one person may need the flexible schedule of an online program, he says another might benefit more from the personal interaction in the classroom.

Magers tells prospective students looking for online opportunities to go with an established school with a campus. He says they should ask: How large are the class sizes? How often is the instructor engaged with students?

Some schools offer a blended degree with both online and classroom learning.

Other Considerations

Other considerations Magers suggests are:

• Who's teaching the courses? At some universities, he says, professors tend to be engaged in research and delegate teaching to junior faculty and even teaching assistants.

• What's the ratio of full-time to part-time instructors? "There's nothing wrong with adjuncts," he clarifies. "Every university uses them, but, at some, you could get an entire degree from part-time faculty and never end up taking a course from tenured faculty with more experience and expertise. Look for a university with a mixture of full-time professors and some adjuncts."

• How are part-time instructors selected? Typically, people who are doing what they are teaching are good teachers, he says.

Limited Enrollment

Some universities limit enrollment based on GPA, test scores and other criteria. While it's possible potential students will not be admitted to the schools of their choice, Magers says many undergraduate programs, especially those at smaller state universities, have open enrollment.

"If you graduated from an accredited high school, you're going to get accepted," he said. For graduate programs, it's going to take a 3.0 GPA and often a favorable GRE score. "If the GPA is lower and the test score is lower, often what happens is students will be admitted conditionally," Magers said, noting this is especially true if they obtained a bachelor years ago and have done well professionally.

Beyond the Diploma

After graduation, career services may be important. What does the school offer? Does the school help its students find jobs? "Prospective students need to be good consumers and ask questions," Magers says. "Universities with good marketing skills are not necessarily the best universities. They might have a lot of glitz and glitter, and no substance. When you're spending a lot of money on a degree, you want to get something from it."

Your One Stop Shop for Equipment & Supplies

Trust the leaders in one-stop law enforcement equipment & supplies. Our dedication to you along with our unsurpassed inventory and pricing enable us to be the ultimate One Stop Shop! Partnered with the most trusted brands like Blackhawk, 5.11, ExtremeBeam, Garrett & more, we have everything you need in one convenient place. Call Caroleann Fusco today to uncover what Adorama can do for you!

1. Binoculars& Accessories —
Don't miss a thing! We have all the top brands for all types of field use from surveillance to night vision.

2. Rifle & Spotting Scopes —
Improve your accuracy while saving time and money! Adorama has the top brands and inventory on rifle scopes, spotting scopes, handgun sights and more.

3. Radios & communication —
Reliable communications is critical to your job, and Adorama has the high performance and best brands of equipment you need.

James L. McClinton, Ph.D

JUST WHEN HE THOUGHT HE WAS DOWN-AND-OUT, HE BOUNCED RIGHT BACK!

Police in Geraldton, Australia, reported that they had captured a thief they were chasing in the dark through a neighborhood. Officers had to admit that the thief may have gotten away if it hadn't been for a tactical blunder. When the suspect came to a fence and leaped over it, he happened to land on a family's backyard trampoline and was propelled backward, virtually into the cops' laps. *("Look, up in the sky, it's a bird! No, it's a plane. No, it's a flying criminal!")*

Don't worry, the officers were not about to leave her "holding the bag"! ... Police in Guntersville, Alabama, suspected that a woman had resumed dealing drugs which was in violation of a first offender's program which had kept her out of jail. So, they went to her house and knocked on her door to ask about some evidence they had come across. According to the police report, the woman was absentmindedly holding a bag of crack in her hand when she opened the door for them. *(Can someone who doesn't have any brains still be considered "out of her mind"?)*

Imagine that, a corrections officer turned in a confessed murderer – criminals just can't trust anyone anymore!... In 2009, a Tennessee man concluded that he had gotten away with a 1995 murder. But, when he had a heart attack, an overwhelming sense of remorse led him to confess the murder to a confidant. He was already serving time in prison for a lesser, unrelated offense and told a guard, "I have to get something off my conscience." But, much to his chagrin, he recovered from the heart attack, but wasn't allowed to take back his confession. Making matters worse was the fact that Nashville prosecutors were not moved by the confession and used it to augment the sparse evidence from 1995. In 2012, the now healthier man was convicted of the murder and sentenced to 51 more years in prison. *(The heart attack didn't kill him, but 51 more years in prison probably will!)*

"Huh...what did you say, Missy? What??? No, why would I want fries with that?"... A 45-year-old man was arrested for soliciting prostitution in New Milford, Connecticut, but the arrest was not the result of a successful sting which is usually how arrests for that crime are made. In this man's case, he was disturbing other customers at a Friendly's restaurant because the accused is hard of hearing and was shouting to the prostitute the terms of their prospective business arrangement. *(Do you want fries with that shake?)*

This is why idiots shouldn't buy "smart phones" – they quickly find themselves "outsmarted"... A couple of dashing young thieves entered a hotel in Naples, Florida, and demanded money from the clerk. The clerk handed them an unspecified amount of cash and waited for the duo to leave so he could call the police. Suddenly, the clerk's phone at the front desk rang. On the other end of the line, the clerk could hear a conversation taking place between two people discussing the robbery they had just committed. It turned out that one of the two geniuses "pocket dialed" the front desk of the hotel they had just robbed. Police arrested them both soon afterwards. *(That's what they get for installing the "Butt Dialer" app on the phone!)*

"Circling the wagons" is a pretty good protective measure – when you have more than one wagon!... A man in Wister, Oklahoma, likes to take his covered wagon out for a little ride from time to time. He hitches a couple of mules to it and occasionally treats himself to a "hydraulic sandwich" as well. Recently, police noticed him driving erratically just before he allegedly rammed the patrol car with his wagon. When officers stopped the man, he offered up a not so plausible excuse - he blamed the mules. He said the officers got too close and spooked the critters. The officers didn't feel his excuse was credible and charged him with public intoxication, along with assault and battery on a patrol car. *(Oh, so that's how the West was won!)*

Yeah, and it would be safer to put school crossing zones in fields where there are no cars or kids to worry about!... At an FM radio station in Fargo, North Dakota, a state highway official said that he did not know how to respond when a female motorist called a phone-in talk show to ask him a question which had her puzzled. The female caller couldn't understand why the state had placed so many deer crossing signs in high traffic areas and asked the official, "Shouldn't we be encouraging deer to cross roads in lower traffic areas instead?" *(...and, instead of putting up signs which say, "ROAD CLOSED," let's just leave the roads open!)*

Who's the crazy one here: the city for issuing 678 parking citations, or the woman who accepted them without complaining?... An abandoned car in Chicago worth an estimated $600 has been issued more than $100,000 in parking tickets over the past three years. A 31-year-old woman is currently stuck with the bill, but says the 1999 Chevy Monte Carlo actually belongs to an ex-boyfriend who registered the car in her name without her knowledge or consent. From May 23, 2009, through April 30, 2012, the Chicago Department of Finance (DOF) issued 678 tickets against the car, totaling $105,761.80, which set a Chicago record both for the total number and amount of parking fines issued. The woman says she doesn't owe the city a dime and has filed a lawsuit in Cook County Circuit Court against the city of Chicago and the ex-boyfriend. *(She says the car was registered without her "knowledge or consent," but most of us would have figured that out after receiving citations #2 thru #678!)*

New Technology

New Patrol Vehicle Harness

The **Integrator Level 2 Patrol Vehicle Harness**, from MNSTAR Technologies, is designed for regular marked patrol, Special Service SUVs and federal law enforcement vehicles. The design of the harness accommodates the installation of law enforcement equipment in both Pursuit Rated and Special Service Vehicles. The product provides a common architecture to the entire patrol fleet, regardless of make or model of vehicle. By utilizing the same standards, wire colors, and circuit identification found in all MNSTAR law enforcement products, this **Harness** combines fleet-wide uniformity with an adaptable design.

The **Integrator Level 2 Patrol Vehicle Harness** is available in either front, mid-ship or rear battery layouts and features a single centralized fuse panel in the rear of the vehicle.

New Interior Lighting System

Ideal for most undercover and highway vehicle applications, the **SpectraLux ILS**, by Federal Signal, offers the same advanced warning and directional lighting as a full-size lightbar and is equipped with the FS Convergence Network for plug and play installation and programming. This system features multicolor LED capability; while in operation, a single LED light source can change color combinations from red, amber, blue, or white. Inside the vehicle, the low profile **SpectraLux ILS** blends into the headliner. White LED options can be used as takedowns, work lights, or as a floodlight. Rear models operate as a standard emergency warning or directional warning for oncoming traffic.

New Concealed Carry DVD

Panteao Productions recently introduced the first in a series of "Make Ready" videos from Matt Jacques, ***Fundamentals of Everyday Carry***. In this video, Matt Jacques walks you through all of the fundamentals of everyday carry in a step-by-step approach. A retired police officer who served with two Virginia law enforcement agencies; a special deputy of the US Marshal Capital Area Fugitive Task Force for the Washington, DC area; and a Marine Corps veteran, Matt now trains both law enforcement personnel and civilians under his company, Victory First.

Matt reviews the different handgun options and ancillary equipment; holsters and belts; carry positions; clearing a cover garment; cover garment modifications; the grip, draw and presentation; loads and reloads; dealing with multiple targets; drills you should practice; and more.

New Lightbar

Whelen Engineering Co., Inc. has announced the new **Legacy™ All LED Lightbar**. Reminiscent of the classic Edge® in styling, but with an even lower profile than the Liberty™ Lightbar, **Legacy** was redesigned to maximize the performance of today's LED technology. There are no dead spots or gaps, just an amazing 360° of continuous light with new flash patterns. It is available in solid and Duo™ color models; a rugged two-piece slide on dome and a sealed single center divider assure lightbar integrity in all weather conditions; adjustable takedown and alley lights are available.

MIL SPEC:

MAXIMIZED

NVD is pleased to announce that all of our Night Vision Products are now available with full MIL SPEC ITT/Exelis Image Intensifiers, including our ULTRA MIL SPEC tube line. We believe that these ULTRA MIL SPEC tubes are the highest performing image intensifiers currently marketed. These MIL SPEC tubes are also available for system upgrades, and are available in the following selections: YG, VG and ULTRA. Contact us, or visit us at NVDepot.com for more details.

You can run, but you can't hide.

With ITT Exelis' DSNVG Fusion Technology, the night belongs to you.

Dramatically increase your situational awareness with our incredibly lightweight DSNVG -- Fully equipped with three modes: I2, Thermal and FUSION (which combines I2 with Thermal). When you're in pursuit, nothing gives you a better advantage.

The Dual Sensor Night Vision Goggle.

What mode will strengthen your advantage?
